CECS174

Lab W8

A- Answer the following questions:

1. What is a shorter way to express **range(0, 5, 1)**?
2. If x is bound to the integer value 2, what integer sequence does **range(x, 10*x, x)** represent?
3. If x is bound to the integer value 2 and y is bound to the integer 5, what integer sequence does **range(x, x + y)** represent?
4. Is it possible to represent the following sequence with a Python range expression: 1, -1, 2, -2, 3, -3, 4, -4?
Explain if not, write it if yes.
5. Is it possible to represent the following sequence with a Python range expression: 1, -2, 3, -4, 5, -6 ..., n-1?
Explain if not, write it if yes.
6. Provide the exact sequence of integers specified by each of the following range expressions.
 - a. range(5)
 - b. range(5, 10)
 - c. range(5, 20, 3)
 - d. range(20, 5, -1)
 - e. range(20, 5, -3)
 - f. range(10, 5)
 - g. range(0)
 - h. range(10, 101, 10)
 - i. range(10, -1, -1)
 - j. range(-3, 4)
 - k. range(0, 10, 1)
7. Provide an equivalent Python range expression for each of the following integer sequences.
 - a. 1, 2, 3, 4, 5
 - b. 5, 4, 3, 2, 1
 - c. 5, 10, 15, 20, 25, 30
 - d. 30, 25, 20, 15, 10, 5
 - e. -3, -2, -1, 0, 1, 2, 3
 - f. 3, 2, 1, 0, -1, -2, -3
 - g. -50, -40, -30, -20, -10
 - h. Empty sequence

B- Write the Python code that outputs every number divisible by 7 from 2 through 200 using:

- For loop
- While loop

Demonstrate your code to your lab instructor. Upload one file that has your code.
